MAKMAX AUSTRALIA

MakMax Australia has a range of custom-made, high-quality shade structures designed to blend architecture with environment.

These unique and innovative shade structures offer complete weather protection and aesthetic appeal – select from custom-made architectural membranes, architectural car parks and stunning architectural umbrellas. The MakMax range is available in a variety of attractive styles, colours, support fittings, coverings and accessories. Accessories such as heating, lighting and blinds can further extend the area's use into night, beyond hot summer evenings into the cool nights of winter, to stop seasonal turnaround.

MakMax shelters are the world's best – their long-lasting fabric and durable and flexible fittings are uncompromising in quality. Why not choose one of MakMax's 100% environmentally friendly fabrics (ETFE), offered exclusively by MakMax Australia? Or choose the new TiO2 membrane that has amazing self-cleaning and heat-preventive properties.

Contact MakMax to see how the form and function of architectural structures can go beyond performance and to the next generation.

CORA BIKE RACK – BICYCLE PARKING SYSTEMS

Cora Bike Rack is a leading manufacturer of bicycle parking products. Designed for ease of use and installation, Cora bicycle parking products are well suited to all applications – indoor, outdoor, surface mount or wall mount.

In consideration of the significant health and environmental benefits provided by cycling, many development approvals now require the provision of secure bicycle parking facilities. Cora Bike Rack's secure and attractive bicycle parking products encourage bicycle use and enhance streets and landscapes.

Ideal for public or private access, residents, employees or students, Cora bicycle parking racks are the proven solution for your bicycle parking requirements. All Cora products comply with AS 2890.3 and Green Star guidelines.
